

Senior Architect with over ten years of experience, strong creative and technical skills, and a passion and appreciation for design and detail. I have a keen interest in sustainability and circularity and am one of the [GlassPass](#) co-founders - spearheading a platform providing an effective tracking, sorting and separation solution for construction glass in order to enable it to be circled back into production.

I have international experience in the UK, Europe, and Asia, and have gained valuable experience working in the cutting edge and internationally renowned company AEDAS.

I possess excellent team management, communication and leadership skills gained through working in multidisciplinary projects. I design, run, and deliver high quality projects on time and within budget, and have a comprehensive knowledge of building standards and regulations.

I have worked in multiple sectors including hospitality, education, residential, civics & culture, sports & leisure, and industrial - and have experience working across different project phases - from design concept, to design development, planning, tender, construction and detailing.

I easily adapt to various team roles in order to provide a quick and effective response to any design requirement and possess excellent interpersonal skills, to build and develop key relationships at all levels, including colleagues, clients and consultants.

Work experience

Michael Spark Associates LLP | February 2016 - present | London, UK

www.msa-architects.co.uk

Senior Architect

Designed, managed, and delivered from concept to completion single and multi-unit developments with ancillary offices.

Worked closely with our clients and main contractors, providing the optimal design solution supporting our clients' vision, and liaised with all stakeholders to communicate the design intent, and streamline the design process.

Successfully led a team including a senior architect, and an architect, through a succession of highly time constraint deadlines, and reviewed and coordinated the design information made available throughout the design team.

Omega Park

Single speculative industrial unit with ancillary offices | 15,500m² | 2021 | Warrington | Tender; Preliminary Construction
